

Selling Features:

1. 13.2 Volt for high performance
2. Reduced memory effect
3. Serialized label for maintenance and performance tracking
4. Automatic thermal reset protection
5. Ultrasonic sealed water resistant ABS pack
6. Quick check fuel gauge

Specifications:

Voltage: 13.2 Volts

Max. Current load capacity: 8 Amps

Charge Time: Approx. 1 hr.

Watt rating: 25 Watts

Amp/Hours: 1.9

Weight: 1.5 lbs.

Life Cycles: 1000

Technical Charts & Data:

Charger	Charge Time
ROQ-4, 460	1 hr., 3 min.'s
ROQ-1000, 2060	55 min.'s

Load	Run Time
12 Watts	2 hrs., 5 min.'s
20 Watts	1 hr., 15 min.'s
30 Watts	49 min.'s

Commonly Asked Questions:

1. Can I use this 13.2 volt battery where I would normally use a 12 volt battery?
A: Yes - 13.2 volt batteries have been around for years and are used because of their decreased memory effect and better cell performance.
2. Whose cells are inside the batteries?
A: Aspen uses high quality Japanese cells in all their batteries.
